

## What can they see?

Picture yourself in a large crowd, standing on a two foot ladder, looking over the people through 7x35 Binoculars, focus clearly, then close one eye.

**The view quality is UNBELIEVABLE!**

Sportsscopes are high quality products manufactured through Mickelson Group, Inc. These aluminum alloy hand-held periscopes are extendible and provide clear, magnified, unobstructed views over crowded galleries at golf tournaments and other events. They consist of highly polished glass lenses, fine glass prisms, a focusing eyepiece, height extension system, detachable plastic handle, and a carrycase. Our newest and top of the line product is a Variable Power (VP) ZOOM model. QWM-1 and VP-ZOOM models look alike except for the zoom adjustment.

**VP-ZOOM**  
SPORTSCOPE®

## INSTRUCTIONS:

1. For a wider field of view, place the eyepiece close to your eye.
2. Adjust the ZOOM power, if available, then turn the eyepiece to focus.
3. Use the knob at the bottom of the slide bar for moving the slide bar up or down to adjust the periscope height.

## SPECIFICATIONS
